

## Summary

Passionate Software Engineering student with a solid foundation in front-end development and graphic design. Skilled in creating responsive, user-friendly web applications. Committed to continuous learning and eager to contribute technical and creative skills to build impactful, intuitive software solutions in collaborative team environments.

## Experience

FYP Portal

### FYP Project

June 2025 -June 2026

For our Final Year Project (FYP), we are developing a comprehensive **FYP Portal**. This system will include complete frontend website, backend functionality, and a well-structured database. The portal will streamline processes like user registration, project proposal submission, supervisor assignment, progress tracking, and evaluation

Other Project

### Front End Developer

June 2025 -August 2025

I am currently working on an **E-commerce website** using **HTML, CSS, JavaScript, and Bootstrap**. This project focuses on replicating the front-end layout and design, including features such as a responsive navigation bar, search bar, product listings, product detail pages, and a basic "add to cart" interface. By utilizing Bootstrap, I've ensured that the layout is fully responsive across various devices. This project is enhancing my front-end development skills, deepening my understanding of responsive design, and providing valuable hands-on experience in building modern, user-friendly e-commerce interfaces..

Programmer Tech

### Graphic Designing Intern

June 2024 - July 2025

During my internship at Programmer Tech in June 2025, I worked as a Graphic Design Intern. My responsibilities included designing posters, creating promotional content, and contributing to UI/UX projects. I used tools like Canva for quick visuals and Figma for professional, collaborative app designs. In the final evaluation, I was ranked among the **Top 5 students** based on creativity, performance, and design skills. This internship enhanced my design abilities, improved my proficiency with industry tools, and strengthened my time management in creative tasks.

University project

### Django Backend Developer

September 2024 - January 2025

As part of a university project, my team and I built an **Instagram clone** using **JavaScript, Django, and HTML/CSS**, focusing on full-stack development. Key features included user authentication, post creation and deletion, likes, comments, real-time feed, and profile pages. I contributed to both frontend design and backend logic using Django. This project strengthened my skills in web development, database integration, RESTful APIs, and collaborative problem-solving.

## Skills

### Front End Development:

- HTML
- CSS
- JavaScript
- Bootstrap
- Tailwind CSS

### Design Tools:

- Figma
- Canva

### Web Development Tools:

- UI/UX Principles
- Version Control (Git, GitHub)

### Soft Skills:

- Creative Problem Solving
- Team Collaboration
- Time Management

### Communication

#### Currently Exploring:

- Advanced JavaScript
- React.js
- Full-Stack Development concepts
- Front-end development

## Education

COMSATS University Islamabad , Sahiwal Campus

2022-2026

Bachelor's: Software Engineering

Aspire College , Mian Channu

2022-2022

Pre-Engineering

## Profiles

LinkedIn: <https://www.linkedin.com/in/ume-farwa->

GitHub: <https://github.com/Ume-e-Farwa>

## Certifications

I have an internship certificate from a **Graphic Design program** where I worked as a designer. In addition, I have earned various certificates, including **Microsoft and MLS-based** certifications. I also completed several online courses from **Coursera** and I have the certificates to verify those as well.
